

*"Be proud of everything you do, for what you do and how you do it tells others who you are."*

**Course Description:** The Advanced Placement European History course is considered the equivalent of a full-year, freshman *college* survey course in Western Civilization. It is designed to prepare students for the AP European History Exam in May. Students who pass the exam (3 or better out of 5) *may* earn college credits.

In addition to providing a basic narrative of events and movements, the goals of the AP European History program are to develop: (a) an understanding of the principal themes in modern European history, (b) an ability to analyze historical evidence, and (c) an ability to analyze and express historical understanding in writing. What sets this course apart from an "honors" course is *extensive* reading of college level texts, combined with a heavy emphasis upon analytical skills that include forming and substantiating various historical hypotheses. Major themes of the course include the basic chronology and major events and trends in European history from approximately 1350 to the present, as well as various interpretations of the European past. Significant emphasis is given to political and diplomatic history, intellectual and cultural history, and social and economic history.

All students enrolled in AP European History will take the AP European History exam on **Friday, May 7, 2010**. There is an assistance program to help students in need cover some, if not most, of the \$80+ cost. Therefore, any student who does not take the exam will be required to complete a major alternative research assignment.

### Classroom Expectations
